

Councillor Bill Connor report.

Tay Road Bridge Incident report

See attached

Tayport Harbour

The Army are conducting a major exercise in and around the river. 3rd to 21st September.

They will be operating two ribs in and out of the harbour, berthing them on the end of C pontoon overnight. They will also be operating two workboats bringing in used equipment to land in the harbour. The workboats will berth on North wall between Rassy Lass and Fingal using flatbed lorries with HIAB's to lift the loads out and away. The workboats will not be overnighing in the harbour.

Two minibuses will be parked up in the harbour for their use as and when needed.

Area Officers Jim Stenhouse Ext: (497121) Mobile: 07507494610 John Easton Ext: (493640) Mobile: 07985712381 Colin Davidson Ext: (496890) Mobile: 07984496767	Area Officers Kevin Jolicoeur Ext: (446656) Mobile: 07720337589 Craig Balfour Ext: (472839) Mobile: 07984496973	Area Officers Richard Brown Ext: (460710) Mobile: 07984459888 Roger Honeyman Ext: (453363) Mobile: 07720337594 Alan White Ext: (450862) Mobile: 07872417729

These changes will take effect as of 6th August 2018

Commercial waste collection changes
BRIEFING PAPER – June 2018

Background and why change?

Resource Efficient Solutions (RES) collect commercial waste on behalf of Fife Council. Current collections are 5 separate containers for: Cans & Plastics, Food waste, Landfill Waste, Paper & Cardboard and Glass.

The current service of multiple containers can be a barrier to new business for RES as customers prefer a co-mingled collection of Dried Mixed Recycling, offered by other waste operators. Multiple containers also contribute to commercial bins in town centres, a mixed collection is consistent with the general move to reduce the number of commercial waste containers in historic town centres.

What is changing?

RES will collect all paper, card, cans and plastic recycling in one container rather than current two containers, reducing the number of collections for this material from 2 to 1. The material will then be sorted and recycled. This does not affect the household waste collections service and only covers material collected from commercial customers.

This single Dried Mixed Recycling container, will be the blue bin and will replace the blue bin for paper & card and orange bin for cans & plastic.

In order to maximise the efficient use of vehicles the commercial waste collection will also include the collection of materials from the recycling points.

This service will continue to comply with the Waste (Scotland) Regulations 2012.

When will the changes take place?

A trial is starting Friday 22nd June covering mainly west Fife. If it is successful, it is proposed to make the changes permanent and roll-out the Dried Mixed Recycling service across Fife in the following months with all commercial properties on a DMR collection and routes optimised by the end of September.

How will the changes be communicated?

All customers will be notified of the changes by letter and will be able to contact the sales team should they have any queries or want to change their service in any way. The trial areas have already received a letter. In order to ensure the material is of good quality all customers will also be provided with an information pack detailing what can and can't go in the bins and the arrangements for collection.

The contact centre have been made aware of the changes as have the CCZW team that deal with Recycling Point enquiries. There is no plan to change the recycling point bins as the commercial team may not always be the collector of these bins.

ROADS & TRANSPORTATION SERVICES

TEAM FUNCTIONS & CONTACT DETAILS – AUGUST 2018

SERVICE MANAGER Passenger Transport Colin Hamilton Ext. 444412

SENIOR MANAGER

Roads & Transportation Services Derek Crowe Ext. 450441

SERVICE MANAGER Asset Management & Commercial Ian Smart Ext. 444376
